| ESTUDIOS |

Dada la función $f(a,b,c,d)=\sum m(1,4,6,7,8,13,15)+\sum d(0,3,10,12)$.

1. representar la tabla de verdad de la función (2 puntos)
2. calcular la expresión de conmutación simplificada (5 puntos)
3. implementar con puertas and, or y not (3 puntos)

Solución:

a) $f(a,b,c,d) = \sum m(1,4,6,7,8,13,15) + \sum d(0,3,10,12)$.

| a | b | c | d | f |
|---|---|---|---|---|
| 0 | 0 | 0 | 0 | d |
| 0 | 0 | 0 | 1 | 1 |
| 0 | 0 | 1 | 0 | 0 |
| 0 | 0 | 1 | 1 | d |
| 0 | 1 | 0 | 0 | 1 |
| 0 | 1 | 0 | 1 | 0 |
| 0 | 1 | 1 | 0 | 1 |
| 0 | 1 | 1 | 1 | 1 |
| 1 | 0 | 0 | 0 | 1 |
| 1 | 0 | 0 | 1 | 0 |
| 1 | 0 | 1 | 0 | d |
| 1 | 0 | 1 | 1 | 0 |
| 1 | 1 | 0 | 0 | d |
| 1 | 1 | 0 | 1 | 1 |
| 1 | 1 | 1 | 0 | 0 |
| 1 | 1 | 1 | 1 | 1 |

b) para calcular la expresión de conmutación simplificada se utiliza mapas de Karnaugh

| f | C,D | | | | |
|-----|-----|-------------------|-------------------|-------------------|-------------------|
| | | 00 | 01 | 11 | 10 |
| A,B | 00 | d ⁽⁰⁾ | 1 ⁽¹⁾ | d ⁽³⁾ | (2) |
| | 01 | 1 ⁽⁴⁾ | (5) | 1 ⁽⁷⁾ | 1 ⁽⁶⁾ |
| | 11 | d ⁽¹²⁾ | 1 ⁽¹³⁾ | 1 ⁽¹⁵⁾ | (14) |
| | 10 | 1 ⁽⁸⁾ | (9) | (11) | d ⁽¹⁰⁾ |

$$f = \bar{c}\bar{d} + \bar{a}\bar{b}d + \bar{a}bc + abd$$

c)
